

NEW! PTT Talk Group & Contact Lock Feature

The Southern Linc PTT app now has a PTT Talk Group & Contact Lock feature that has been activated on your phone to help prevent unwanted additions or selections of Contacts or Enterprise Groups while the PTT application is open.

This feature **locks ONLY the contact or group selection area** of the Linc PTT main screen (see [highlighted](#) area at left). The selection icons in the blue ribbon under the call bar and the icons at the bottom of the screen remain active.

The screen displaying your PTT Groups or Contacts will automatically lock after 10 seconds if no Contact (or Group) is selected. This feature can be turned off in the Settings menu of the Linc PTT App.

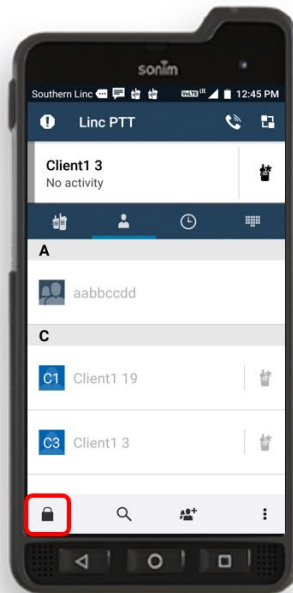

You can make a PTT call to the Contact or Group listed in the call bar at the top of the PTT main screen while the selection area of the screen is locked. You can receive PTT calls while the screen is locked as well.

The new lock icon at the bottom of the screen replaces the “Add Contact” icon. That function has been added to the menu under the three dots icon.

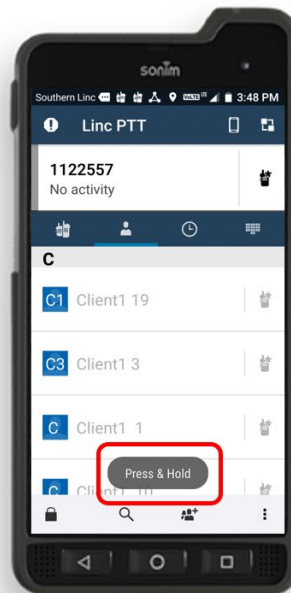

Step 1. Unlocking the feature.

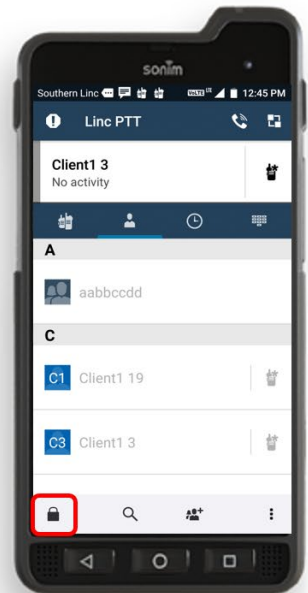

Open the Linc PTT app.

Your screen will appear gray because it is locked. See the lock icon in the lower left corner of the screen.

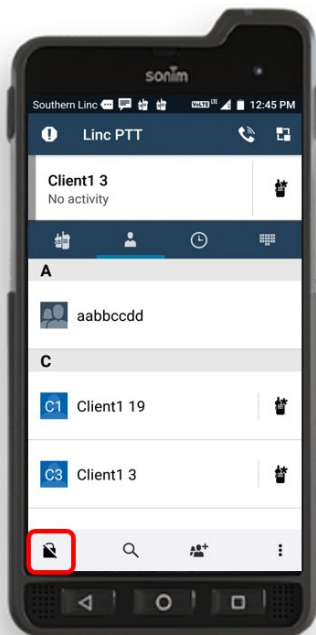

When screen is locked, this message will appear when you touch a contact or talk group.

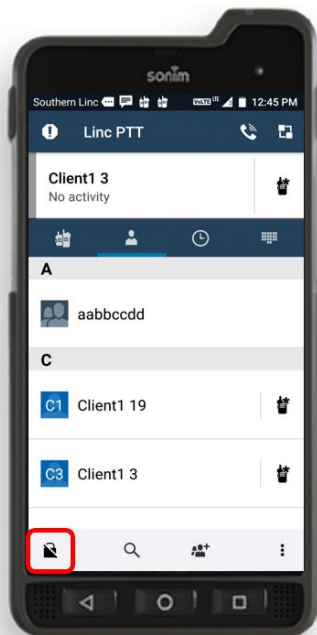

Touch and hold the lock icon to unlock the screen.

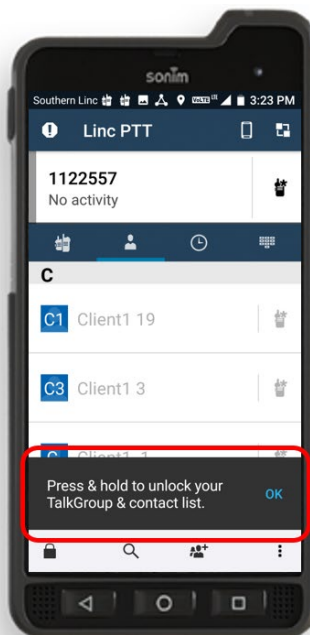

Step 2. Locking the feature.

A slash appears over the lock icon when your screen is unlocked.

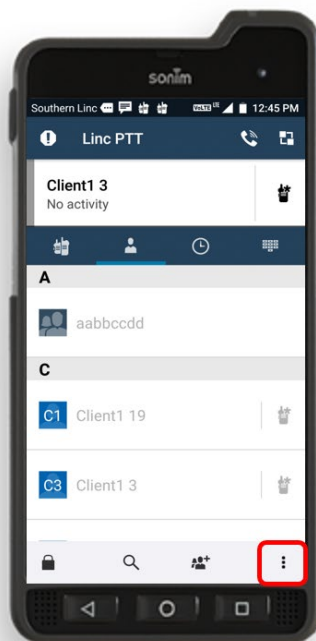

Your screen will lock if you do not select a contact or group within 10 seconds. To lock immediately, press and hold the lock icon.

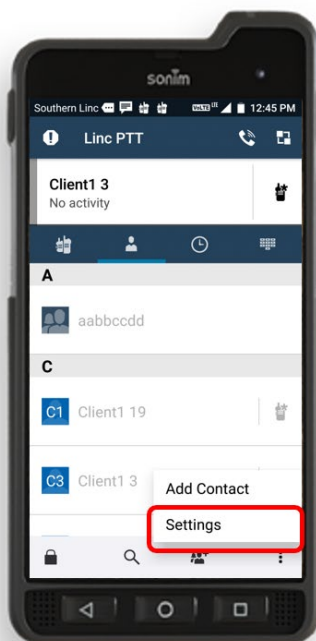

You will see this screen after the screen is locked.

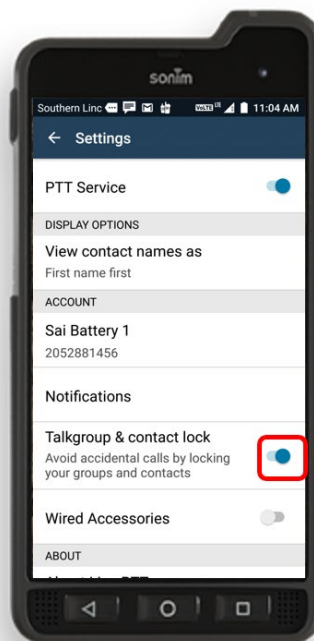

Turning off the feature.

To turn off **Talkgroup & Contact Lock**, touch the 3 menu dots.

Touch Settings.

Touch the toggle to turn off **Talkgroup & contact lock**.
